

PURSE OF GOLD FOR REV. McLEAN

Friends and His Congregation Tender Him and Mrs. McLean Social Evening

There was a large gathering of the friends and members of the congregation at the social evening given in honor of Rev. D. R. and Mrs. McLean in the town hall last Tuesday evening. It was the eve of the minister's departure for another field of labor and the affair gave the citizens an opportunity to say farewell, express appreciation of Mr. and Mrs. McLean's services and extend to them best wishes. The stage looked very pretty, being decorated with wild flowers and Union Jacks. B. C. Affleck occupied the chair and made the presentation of a purse of gold on behalf of the citizens. The program included solos by Mrs. MacKay and Mr. Forester, Hazelton, Mrs. Warner, Mrs. Muirhead and Mr. MacKenzie, and recitations by Miss Margaret Crawford. Rev. Mr. McLean made a feeling address after the presentation and he was followed by Dr. Wrinch.

Refreshments were provided by the ladies after which Mrs. McLean sang and the evening was brought to a close with the singing of Auld Lang Syne and God Save the King.

GERMAN OFFENSIVE STOPPED IN GALICIA

Petrograd, May 27—Official—Near Ossowetz on the outskirts of the village of Sosnia, a German attack was repulsed by the fire of our infantry. In the vicinity of Lemnos there has been violent artillery fire. On the left bank of the Vistula we repulsed many feeble attacks. A desperate battle on both banks of the river San between Jaroslau and Przemyśl continued throughout May 25th.

FRENCH PROGRESS AT DARDANELLES

London, May 25—On May 21 the first French division made considerable progress and are now close to the Turkish trenches. On the 22nd the enemy made a determined attack against the left of the Indian brigade at 3 p. m. They gained a temporary footing, but a strong counter-attack at once organized drove the Turks back with the loss of over 500 men. A number of prisoners were taken.

Danish Steamer Lost

South Shields, May 27—The Danish steamer Betty was torpedoed in the North Sea. The crew was rescued and brought here today.

CANADIANS BEAT BACK THE ENEMY

Jumped from Trenches and Attacked Germans With Bayonets—Both Sides Suffer Big Loss

London, May 27—The Canadians and Indian troops on Sunday night, repulsed at the point of the bayonet, a German attack near Richebourg. Having destroyed both wire entanglements by means of a heavy artillery fire the enemy launched a strong attack and succeeded, despite severe losses, in reaching our trenches. They were met by an inferno of rifle fire before which they wavered. Then the Canadians leaped from their trenches and met the German reserve with the bayonet as the latter came up to strengthen the advancing force. The Canadians, fighting with terrific vigor, simply fought the attackers off their feet and pursued them into the open. Our losses were heavy, but the defeat suffered by the Germans was severe both morally and materially. The progress made justifies the belief that the German hold on the region of LaBasse will soon become loosened and necessitate their withdrawals to new lines of defence. To strengthen this comes a report that the Germans are now evacuating several towns.

ITALY IN THE WAR WITH THE ALLIES

Proclamation Took Effect May 24—Have Occupied Several Austrian Towns

What the neutrals have been expecting, the allies hoping and the Kaiser fearing, happened on Monday when the war clouds that have been rapidly lowering over Italy for the past few weeks burst and precipitated Italy into the European cataclysm. Italy declared war on Austria at 2 p. m. and immediately her armies that have been preparing energetically for the event and that had concentrated near their borders, swarmed across the Austrian border and captured several important towns. Germany declared war on Italy the same day. Many Austrian and German steamers in Italian ports were seized. The Italians were successful in all engagements with the enemy. It is reported that the Germans in the west will fall back to their next line of defence in order to withdraw men to oppose Italy.

Turk Boat Sunk

Paris, May 27—The Turkish gunboat of the Aidin Reis type was sunk in the Sea of Marmora within sight of Constantinople by a British submarine.

TRIUMPH IS SUNK BY A SUBMARINE

Great British Battleship Was Assisting Land Forces When Torpedoed—Fate of Crew Doubtful

London, May 27—The British battleship Triumph has been sunk in the Dardanelles. Official announcement was made last night. While operating in support of the Australian and New Zealand forces on the shores of Gallipoli peninsula yesterday the Triumph was torpedoed by a submarine and sank shortly afterwards. The majority of the officers and men, including the captain and commander, are reported saved. The submarine was chased by destroyers and patrolling small craft until dark. Report does not say whether submarine was Turkish or German but probably was of latter nationality as the British legation at Athens recently offered a reward for the sinking of German submarines supposed to be in the Mediterranean.

Paris, May 27—The French aerial squadron, eighteen strong, bombarded a chemical factory at Ludwigshafen opposite Mannheim. This was the most important explosive factory in Germany. Each plane dropped 110 pounds of projectiles and set fire to many buildings.

REFINE COPPER FOR CANADIANS

Conference Held at Ottawa and Arrangements Made to Establish Refinery at Once

Ottawa—An important conference was held here recently to discuss the question of a Canadian copper supply. While Canada produces much copper there is none refined in this country. It is proposed to establish a refinery in Canada at once. The requirements for copper are enormous, and Canada, in its manufacture of war munitions, has to depend upon its supply from the United States.

At the congress were Major-General Hughes, Col. Bertram and Col. Carnegie, of the shell commission, Dr. Wilson, department of mines, and W. D. Matthews and R. D. Warren, interested in copper mining and smelting. Arrangements are believed to have been made to establish a refinery at once.

The shell commission has raised Canada's output to 30,000 shells per day, and the demand for copper has become very great. Already 50,000 tons of lead have already been used in the making of war munitions, and the lead industry of British Columbia has received a great stimulus.

His Farewell Sermon

There was a good sized congregation in the Presbyterian church last Sunday night to hear Rev. D. R. McLean preach his farewell sermon. He took as his text Paul's farewell to the Corinthians. During the service solos were rendered by Mrs. W. Muirhead and Mrs. L. B. Warner.

Latest War News

London, May 28—A British submarine has sunk in the Sea of Marmora a vessel containing a great quantity of ammunition, and carrying four heavy howitzers and a six-inch gun. She also chased a supply ship with a big cargo of stores and torpedoed her alongside a pier at Rodosto. A small store ship was also chased and run ashore. The submarine then entered the harbor of Constantinople and discharged a torpedo at a transport, which failed to explode.

London, May 27—An enemy submarine torpedoed and sunk H. M. S. Majestic this morning while it was supporting the army on Gallipoli peninsula. Nearly all the officers and men were rescued. The Majestic was a vessel of 14,900 tons and carried four 12-inch, 12 6-inch, 16 3-inch and 12 3-pounder guns, and 5 18-inch torpedo tubes. Built in 1895 and had a peace crew of 757.

INTERIOR TOWNS MAY BURN COAL FROM LAKE KATHLYN THIS WINTER

Frank X. Frank Has Thirty-five Men Rushing Development of His Coal Deposits With Object of Producing a Supply for New Hazelton This Winter
---Have Immense Body of Highest Grade of Anthracite

Will we burn anthracite coal this winter? We will, unless something very serious happens in the meantime. At Lake Kathlyn, forty odd miles east of New Hazelton, Frank X. Frank is opening up, or has opened up, six workable seams of the finest quality of anthracite coal that can be found on the American continent. It is not a matter of whether the coal is there or not. The coal is there and can be seen by anyone who takes the trouble to go and look at it. It can be seen in the tunnels, on the dump, in sacks or burning in the cook stove in the mess house at the camp. It is the real anthracite coal, which is the only coal satisfactory for domestic purposes.

Large samples have been sent recently to various points for exhibition purposes, and in a few days a good sample will be on exhibition in the Omineca Herald office.

Some of this Lake Kathlyn coal was sent to Wilks-Barre,

Pa., the home of the American anthracite, where it was assayed. Mr. Frank received word that it was lower in ash and sulphur than the Lehigh Valley coal and compared very favorably with it in fixed carbon. Assays from other sources classes it in the first ranks of anthracite coal.

Last week the editor of the Herald was a guest of Mr. Frank at the coal fields and was afforded the opportunity of inspecting all the coal seams that have been opened up. The coal is there and in workable seams, and in quantities that will last for hundreds of years even with an enormous daily output.

Lake Kathlyn coal fields are situated on Hudson Bay mountain, or at least on one of the foothills or extensions of that mountain. It is two and a half miles from the railway siding at Lake Kathlyn, with an elevation of between eight and nine hundred feet above the lake, making practicable a gravity tram trans-

portation system from the tunnels to the railway. From the railway to the mines a first-class wagon road has been constructed this season and before the summer is over it will be in excellent shape. The road affords an easy grade for a loaded team and it is through a section that is heavily wooded with balsam, spruce and hemlock, ideal timber for mining purposes. The road is winding and at places affords an excellent view of the Hudson Bay mountain and the surrounding country, making it a beautiful pleasure drive.

The camp is situated just below the Hudson Bay glacier and alongside a roaring creek which is fed by the glacier. From the camp the glacier can be seen to better advantage than from almost any other point and three small streams have a drop of several thousand feet—almost a straight drop—from the glacier. Surrounding the camp is a dense

Our Prettiest Season

New Hazelton and the district surrounding is now looking its prettiest. The wild roses which line all the roads and trails, are in full bloom and a prettier sight one could not wish to see. They are also found on the hill sides and wherever there is an open spot. There are numerous varieties of violets and lilies and almost countless other wild flowers and by no means least, the peavine which is so valuable for feed for horses and cattle. It has already attained a height of three feet and is blooming luxuriantly. Clover, timothy and wild grasses were never before so far advanced and their growth in a wild state is strong evidence of what the agriculturalist can do. On the farms in the neighborhood and in the town gardens the crops are growing rapidly. The wild fruits—raspberries, gooseberries, blue berries, currants, etc., given promise of an abundant crop and many housewives are watching the fruit develop with interested anticipation. The season is much earlier than usual and everything is farther advanced by two or three weeks.

Good Citizens Depart

Owing to life's many changes New Hazelton has lost two of its best citizens in the removal of Rev. D. R. McLean and family to Quesnel. Rev. Mr. McLean was the first Presbyterian minister in New Hazelton, coming here when but few trees had been cut on the townsite, and held services in a tent. He has been one of the real pioneers of the town, and has witnessed many changes during the past three and a half years. He was one of the handful of settlers ahead of construction, he was here during the busy days during construction and he witnessed the falling away of business and population after the Grand Trunk Pacific had been completed and the trains were running. During this changeable period he was an optimist and could see ahead of the present time to when New Hazelton would be a thriving town, built up by the development of the resources of the district. That growth has been started. It will be slow, not due to the district or its resources, but the growth will be sure. In the development thus far Mr. McLean has had an important part. His interest in the district and in the people extended beyond the pulpit. He was always ready to help one in need, and he had the valuable ability to help man, spiritually,

and animals, physically. As a minister he has been a success. He is a good preacher and a clear thinker. He has performed his duties very satisfactorily here. As a citizen he was in the first rank and in everything that was for the good of the town or the people he was ready and willing to take his part. He will be missed as a minister. He will be missed as a citizen. He will be missed as a missionary to animals for such he was, and a good one. New Hazelton has been greatly benefited by Mr. McLean's sojourn here, and it will be a difficult matter to fill his place, as men with the all-round usefulness he possesses are scarce indeed. But not only will Mr. McLean be missed. His wife occupied an important place in the church. She is responsible for New Hazelton Presbyterian church having the best congregational singing ever heard in a small church. In social circles she made many very warm friends. New Hazelton and district extend to Mr. and Mrs. McLean heartiest good wishes for success, health and happiness in their new field of labor. What we lose Quesnel gains.

Kill the Caterpillar

The caterpillar has made its appearance in this district. It was discovered recently by parties looking over the crop of wild berries. From appearances the pest has secured a fairly good start and is on the way to make still further progress. It will be found chiefly on goose berry and currant bushes, and later on when their numbers have increased and their favorite feed has decreased they will attack anything that is green. Anyone who has once witnessed the destructive work of the caterpillar will never forget the tremendous amount of damage, both to the crops and to the trees and bushes. The writer has seen practically all shade and fruit trees in a large city striped clean of their foliage by these crawling animals. Now is the time for every resident in town and district to take steps to destroy the pest. Cut off every branch with a web on it and carefully burn it taking care that none of the eggs or young are lost. The provincial horticulturist has been notified and he can be applied to for assistance or advice in destroying the animals.

MAY BURN COAL DURING WINTER

(Continued from first page)

forest of beautiful trees and this will be gradually cleared up and converted into a park for the use of the miners and the public who will visit the spot for the purpose of seeing the glacier.

The formation of the coal-bearing mountain is regular, and the coal can be seen outcropping in seam after seam, varying from one or two feet to twenty feet in width. In length the coal extends a great distance. Mr. Frank has traced some of the seams from one to eight miles.

The six seams opened up vary in width from four feet to thirteen feet, and in the latter the full width has not yet been ascertained. The work done has all been by tunnels and these run into the mountain for a distance of from a few feet to twenty-five feet, and in every case the face of the tunnel contains all clean coal. The rock which seemed to divide the seams on the surface, or face of the mountain, disappears, and anthracite coal takes its place. Mr. Frank believes that as he lengthens the tunnels that several seams will come together, giving him a working coal face of as much as forty feet. Between the first tunnel and the sixth it is the contention of the operator that he will have at least one hundred feet of coal.

Lake Kathleen coalfields are looming up as an immense enterprise, many times larger than the operator anticipated when he undertook the early development. He started off with ten sections and was prepared to be satisfied with a coal deposit of miniature size. It was the quality of the stuff that attracted him. But since he has gotten the work under way he is convinced that the Lake Kathleen anthracite coal will supply the entire northern part of British Columbia with coal for hundreds of years and have as much more for the Coast and the prairies. It is only a matter of getting it out. The present workings are hundreds of feet below the top of the mountain and the coal extends to the top, and how far below the tunnels is a matter for future determination. There is enough above to supply the present generation.

2nd AVE. - PRINCE RUPERT

SYNOPSIS OF COAL MINING REGULATIONS.

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,

Deputy Minister of the Interior.

The Optimism of Advertising

A word that is frequently misused is "optimism." A man engaged in any business whatsoever who looks for success without exercising his faculties to achieve that end, is not an optimist, but a fool

Two things make advertising almost a synonym for optimism. One is that the advertiser who would be successful must be an optimist. The other is that when an advertiser loses his optimism he generally cancels his advertising.

"Business is rotten," exclaims the manufacturer, and forthwith orders all his advertising stopped, little realizing that his own action is one of the principal causes that makes business rotten.

Cancelling advertising is so easy that it is nearly always the first step toward retrenchment. The matter is seldom decided on its merits. It is impulse. Advertising must be an expense, the advertiser reasons. Therefore to cut it off effects a saving.

The stoppage of advertising in times of stress and change has two bad effects upon the business involved. It turns off immediately a method of securing new business and holding old business. In addition to that, it advertises the pessimistic views of the advertiser, and therefore spreads his own lack of

faith in himself, his country, his goods, and the future to other business men who are perhaps on the verge of doing the same thing.

Without in any way minimizing the crisis which the world is now facing, without ignoring the fact that a long, expensive war in Europe will result in a great deterioration of values and a tremendous adjustment of finance and commerce when it is over, there is nevertheless sufficient ground for believing that this country is going on, that the manufacture and consumption of goods will continue, and that the manufacturers who are enterprising, far-sighted and alert enough to take advantage of existing and new markets and to push their business as they would in ordinary times, are going to benefit by their actions.

The point is that the war will either end everything in the world or it will not. If it does not, business, among other things, must go on. In our own country it must go on now. It cannot wait until the war is over.

The real Optimist is the man who hopefully faces conditions as they are

OVERHEARD AROUND NEW HAZELTON

There will be no services in the Presbyterian church next Sunday nor until further notice.

At the recent municipal election in Fort George the people decided to change the name to Prince George.

The catpillers have made an appearance on the wild fruit bushes and the citizens should loose no opportunity to destroy this destructive visitor.

A most interesting document

has been received at this office entitled "Report of the Patriotic Fund." Anyone interested in it may see it at the Herald office.

G. C. Hartley, a former resident of New Hazelton, and now of Prince George, was a candidate for alderman at the first municipal election. He was almost elected.

Mrs. Larkworthy returned to town Saturday night and will be with her son for the next few months. She spent the winter in Vancouver but says she was very glad to get back here.

Thos. J. Casey, representing Patrick Clark, the well known mining operator, visited the Fidler creek and Roher Deboile camps this week. It is expected that he will become interested in this district.

W. S. Harris examined the big mineral property at Owen Lake last week and reports that it is a low grade copper property that is well worth developing. There are three strong veins, one being six feet wide.

Roy Clothier came down from the Silver Cup on Saturday over the week end. He has the property in shape now to put a number of men to work. The trail is in shape so that they can get horses up to the camp and they have a bunch of ore ready now to take out.

Rev. D. R. McLean, Mrs. McLean and two children left on Wednesday night. Mr. McLean goes to the general assembly of the Presbyterian church in Toronto. Upon his return he will have charge of church work in Quesnel. In the meantime Mrs. McLean and children will visit with her brother in Claresholm, Alberta. A large number of the town people were at the depot to say farewell and to wish them all success.

GERMANS GAINED GROUND AT YPRES

British Were Forced to Leave Trench Under Pressure of Tremendous Volume of Gas and Shell

London, May 26—A report received from Sir John French on May 25 says—Some portions of

our lines east of Ypres which we lost yesterday during the enemy's gas attack have not been recovered. The amount of gas used was more than on any previous occasion, over a front of five miles. The gas was emitted from cylinders throughout a period of four and a half hours, and at the same time our line was bombarded with asphyxiating shells. Gas clouds rose in some places forty feet from the ground. Portions of our lines remained intact throughout the ordeal and our men have demonstrated that with due precautions this form of attack can be met and defeated.

TURK CASUALTIES REACHED 80,000

Two Hundred Thousand Turks With New Artillery Trying to Wrest Gallipoli from the Allies

London, May 26—It is estimated that the Turkish losses in the Dardanelles amount to 80,000. A large number of the wounded are now being sent to Smyrna and Anatele. The Turks have brought up large reinforcements and a large number of guns of all varieties and put them against the allied positions on Gallipoli in a supreme effort to wrest from them ground so dearly won. At one place six successive attacks in one afternoon. The number of Turkish troops now attacking the allied positions exceed 200,000. The Turkish fleet is also active trying by indirect fire to shell the position of the allies.

ITALIANS OCCUPYING AUSTRIAN TERRITORY

Rome, May 26—Italian troops occupy Austrian territory along the frontier from Lombardy to the Adriatic. They have seized towns and are forcing their way through mountain defiles. The Austrians are retreating and destroying their bridges.

ASQUITH PREMIER KITCHENER STAYS

Balfour is First Lord of Admiralty in Succession to Churchill—New Post for Lloyd-George

London, May 26—Lord Kitchener retains the post of secretary for war in the coalition cabinet

and has received the approval of King George. Arthur J. Balfour is the new first lord of the admiralty while Winston Spencer Churchill was given the portfolio of chancellor of the Duchy of Lancaster. Herbert H. Asquith retains the premiership and Sir Edward Grey the ministry of foreign affairs. David Lloyd George will be minister of munitions in the new cabinet.

VICTORIA DAY WAS CELEBRATED

Many Citizens Went to Hazelton—Field Sports and Ball Game—Dance in Evening

A large number from town visited Hazelton on Monday and took in the celebration. In the past Hazelton has celebrated Dominion Day, July 1, but as it has usually rained on that date, the change was decided upon. For ordinary purposes the day was very pleasant but when a crowd is standing on a ball field, or watching races on the street, showers are not particularly popular.

Commencing early in the morning the program was extended throughout the day with a dance in the evening. The rock drilling contest announced earlier was later called off although several drillers had prepared for it. The chief event of the day was the ball game between Smithers and Hazelton, resulting in a victory for the latter by a score of six to four.

E. B. Tatchell was the most tickled man at the celebration. Dewey, the saddle pony he recently sold cleaned up the two chief races and won enough cash to pay for his feed all season.
